

Agatha Reidy Bio:

I have been a nurse for 32 years with a background in the Acute Care Setting and Community Health Environment (Home Health and Public Health) to be considered my specialty area. Serving the community within their own environment as well in the public health arena is a privilege and honor. I have been the Director of Nursing for the Burlington County Health Department for the past four years through our partnership between Virtua and Burlington County Health Department, however with Virtua for 17 years. My first priority is to ensure that quality safe care is the focus of all our clinical programs. Many of our clinical programs have and continue to have process improvement activities utilizing evidence base practices. One of my passions is life- long learning. I learn each and every day from my encounters. I hold two masters in science degrees, one in nursing and the other in health care administration. I am also certified as a nurse executive thru the American Nurses Credentialing Center. The nursing profession had giving me many opportunities. I am proud to say I am a nurse, and proud to be serving the Burlington County Communities'.
